INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 27 May 2017

Partially
Confidential

Could I request that major consideration be given to the denial of the incinerator proposed for construction at Eastern Creek Minchinbury.

The impact on the residents is of great concern, their future is under great threat and the risk to health cannot be denied. Smog, smell, traffic congestion, contamination and mental stress are just a few of undeniable factors.

Surely the State Government responsible as being elected to protect the public from such risks and are also in the position to advise alternative sites protecting the human health and the well being of our children. The Government is morally responsible for its decision.
