## **INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY**

**Name:** Ms Sonia Bennett

**Date Received:** 27 May 2017

I object to this incinerator been built because of the pollution. Fresh air will be affected with a dirty incinerator in Eastern Creek. This is not clean or green technology. I am concerned about the lungs of young children and the elderly. This. incinerator is madness and its people who don't live here will never understnd. Together with another (lemon) Badgerys creek airport western Sydney is doomed to become the cesspool and suburban ghetto of Australia. And its people like the business lobby and our present gaggle of absolute mediocre politicians who will destroy over 800,000 peoples' lives in western Sydney. That is shameful, arrogant and downright sickening. Sonia Bennett,
