INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Kemal Arnout

Date received: 27 May 2017

What an absolute joke!

Claiming that no toxic will be in the air.

Whatever it is you are burning or however it is you are burning it, TOXIC will still get out to the air. The air me, my wife & kids will be breathing including all the others families here in Minchinbury.

My daughter just started Minchinbury public school & we have been advised that if this incinerator goes ahead that kids will not be taken out of the class room.

Really? Kids can not go outside? All because of this ridiculous incinerator!!!!

Why doesnt he just build one near where his family lives and lets see if his family and other families around will be welcoming.

Plenty of land out there away from homes where men, women & children live.

We know money is all your eyes see! Hopefully common sense will prevail!!!!!!

NO TO INCINERATOR!!!!!!
