INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 28 May 2017

Partially
Confidential

The proposal is not in the interest of local community and local residents specially for the residents of Minchinbury. I request committe to oppose this development due to following reason;

1. The proposed site is very close to residential area.
2. Noise pollution will increase and could cause long term medical conditions.
3. The turbine vibration has the potential to damage the structure of our house and also the surrounding houses.
4. The release of chemical odours from the site will make the living conditions unbearable and unhealthy for us and also for the surrounding residents and the environment.
5. The value of our residential property will go down causing enormous financial loss.
