INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 28 May 2017

Partially
Confidential

I think it is significantly inconsiderate to put this near a family dominated area and to inflict those living in surrounding areas to the harmful gases and pollution that this program will cause from burning waste products. Therefore it will cause profound health problems, especially having an affect on those with pre existing respiratory disabilities.

I do not think placing it in eastern creek is a smart nor beneficial for those who will be living in a close proximity.
