INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 27 May 2017

Partially
Confidential

I strongly oppose the incinerator to be built at Eastern Creek.

It is not in the best interests of the community. The impact on air quality and the health of residents living in the neighbouring areas should be of most importance. People with cardiovascular and respiratory problems will only worsen. We shouldn't have to fear our air quality and the definite health problems breathing these toxic emissions will cause.
