INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Daniel Hatcher

Date received: 27 May 2017

Im writing this submission to express my disgust and disapproval against the construction of the incinerator at eastern creek. Western sydney is sick of being the dumping ground for the elites. We already cop the smell from the existing tip at eastern creek that 8 Sydney councils as far a way as Hornsby use to dump there waste. Causing us to live with the toxic fumes and smells depending on the wind. We wont stand for them now deciding to incinerate them now too.
