INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 27 May 2017

Partially
Confidential

I object. I do not accept the proposal of a incinerator being built. I am very upset our Government has not declined the proposal, knowing that majority of communities are against the incinerator being built. If our Government is not hearing us, then how is?

I have done my own research and i am convinced that there will be polution caused be this incinerator which will slowly cause health problems to me and my family.

Stop thinking about your profit and start thinking about your people!

I say No Incinerator for me, for my children and for my communities health sake!
