INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 28 May 2017

Partially
Confidential

This submission supports the submission of _____ and the many others who are in objection to this incinerator.

I object on the basis this is an outdated and polluting method of dealing with waste and will unfairly impact nearby residents who have grave concerns about the health impacts from this project.

Ask yourselves... would the PAC allow this type of development amidst a residential area on the upper North Shore? Or the leafy suburbs of the St. Ives area? No, it would not. Do the right thing and don't allow this ill-begotten project to proceed.
