INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 28 May 2017

Partially
Confidential

As a family man who has lived and worked in the local area for over 30 years, I strongly object to our current government having no consideration for the hard working tax paying residents of western Sydney. We have made our thoughts and concerns known, we do not want an incinerator being in such close proximity to our houses and schools. We are a residential community .How dare the government have so little regard and respect for us. Without a doubt this would not be a consideration in the eastern suburbs. We already have our share of waste disposal facilities in the area and we have to cope with the odour from that. The increase in pollution and traffic implications , not to mention the unknown long term health impacts for this community in western Sydney should be enough to immediately reconsider the placement of this facility. This is a totally unsuitable environment for such a facility. Australia is a huge country with vast, more isolated unpopulated areas where a facility such as this would be more well placed.

thank you for your consideration.
