INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 28 May 2017

Partially
Confidential

This is a 7 year old kid lives in St Clair people can die because we could barely breathe and kids won't be able to go out to recess and lunch and we want to be able to breath in fresh air and that won't help us breath at all and we want free air to breath in we don't want any smoke in the air we want fresh air not rubbish. please don't do it. What about kids and adults who have asthma it will make them really sick. people will have to go to the hospital a lot people will get really really really sick and nobody can't agree to a child and i'm all ready getting a crocy voice and I won't get any better and other people will start getting a cough i'm not being mean if you think I am. kids are quite sense it iv mummy's will get sick picking their kids up from school and pass it on to their kid or kids or even worse their baby's could get sick and govement you don't want your people getting sick do you goverment.
