INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr David Kirk

Date received: 28 May 2017

I wish to put forward my objection to the energy to waste dump at Eastern Creek. I feel this would be a great health hazard to all families living in the area. We already have a grandchild with breathing problems and would be doing a great injustice to her to not object to such an outrage for the government to not consider our children.

We suffer the smells from Eastern Creek and would surely choke on the double up if this went ahead at Eastern Creek.

The traffic in our area is already a nightmare for all without adding more trucks to our roads. I ask why do ordinary working class families have to fight for the right to breath clean air and have our children play in that clean air.

Nobody knows what hazards there will be to all our health with this dump. I object to our health and the health of all our children being put at risk.

As an Australian citizen I feel it is a disgrace to dump near residential areas.

This is truly and outrage.
