## INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

**Name:** Name suppressed

**Date received:** 28 May 2017

---

Partially  
Confidential

I object to the construction of the energy from waste facility being constructed in Eastern Creek. We are a family of four and have lived in Erskine Park for approximately 30 years. We already have to put up with the rubbish tip facilities at Erskine Park and Wallgrove Road, which emit toxic odour that the local community have to endure.

The area is growing and this will drive people away and also devalue our properties but most importantly cause detrimental health issues to the many families living in the area.
