INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Ilmiye Uluc

Date received: 28 May 2017

There are so many things to say but I know many have been said by other submissions. There are 3 specific documents that have resonated and I need to ensure are tabled and considered as part of this inquiry. They are:

National Toxics Network – 10 Reasons why burning waste to make energy is a bad idea,
Waste Management Association of Australia – Sustainability Guide for Energy from Waste,
No Incinerator for Western Sydney – Submission – Upper House inquiry into Energy from Waste.

I am a Registered Nurse and my specialty is Respiratory Medicine so i hold alot of concern over this unnecessary risk to human health in such a modern country like Australia

<http://m.cornwalllive.com/research-link-waste-incinerators-infant-deaths/story-11487492-detail/story.html>

Evidence from different countries suggest that Incineration was a wrong choice and they are slowly getting rid of them

For witnesses in any upcoming meetings i suggest author and expert from the National Toxic Network Jane Bremmer (author of 10 reasons why burning waste to make energy is a bad idea), Mark Glover of Eco Waste, Health Departments and officials and concerned resident groups who have done alot of research.

Thank you so much for your time. Please contact me if i can be of any more help on
