INQUIRY INTO EMERGENCY SERVICES AGENCIES

Name: Mr Greg Dunnicliff

Date received: 7 July 2017

The RFS HQ should be west of the mountains, so that the Rural is placed back into the RFS. Over time i have noticed equipment being designed around a city and not country areas. I believe a move out west will provide jobs for a country centre, and have personnel with a rural view influence the decision making of upper staff. With modern technology being in contact with the premier is probably easier than trying to drive through the city to visit the Premier's office. The city is looked after by Fire and Rescue, the RFS looks after the rest. If you have any questions or would continue this conversation please contact me.

Regards Greg Dunicliff
