**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Garry Jennings

Date received: 16 October 2017

Every month I am supplying around 300 kw of electricity to the grid for which I receive \$30. ie 10c a kw. THEYsell it back to me for around 35c a kw. Plus availability charge . I would love to run a business like that. Irrespective of how you look at it it is nothing but a complete scam because they know we can't do without it.

Additionally the Gov sold power supplies to the private sector, what happened to the money. ? This is all nothing other than another example of the way our country is being managed.
