TraceyEsler

I support a legislated fair price for solar - at the moment massive corporations are inflating their already bloated energy profits off little people like me. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. We are all trying to save our planet and these miscreants are just trying to maximize their profit. Shame on you if you allow this to continue.

Regards,  
Tracey Esler
