**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Ms Mary Notestine

Date received: 19 October 2017

The future is in renewable energy. More and more people are installing solar roof panels and we MUST receive an equitable price for any solar produced and passed back into the grid. It has been most frustrating over the last few years to receive only a minimal feedback tariff for the electricity I have produced via my solar panels. And it took my electricity retailer almost 7 months to install the 'smart' meter promised initially for December 2016.
