**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr William Crumley

Date received: 16 October 2017

All that is being asked is a fair price for solar produced by the public. We did the right thing for all the right reasons but instead of gratitude we get ripped off by the energy companies and little is done by this Government to control them. Australia is a sun drenched country ideal for Solar energy production and we should make the most of it instead of lagging behind the rest of the world.
