**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Max Purves

Date received: 16 October 2017

I support a legislated fair price for solar;

My experience with my retailer has been sporadic with poor service and overly complicated, deceptive behaviour.

I think NSW needs a legislated minimum feed-in tariff that is fair. Not being paid one sixth for the power we produce compared to what they charge us! What a rip-off.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. solar systems and experiences with the feed-in tariff;

I support rooftop solar and renewables, not old polluting sources of power (ie coal and gas).

Please create a fair playing field for consumers as the energy sector's self-interest and greed (ie gold-plating and outrageous price hikes) are inexcusable in such a research-rich country as Australia.

Let's have a fair go for all Australians.

thanks
