**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Claude Stanislaus

Date received: 16 October 2017

Please charge a fair price (at least 50% of what is charged to use the electricity) for the feed in tariff. Also, please introduce legislation making it mandatory that all new houses and major renovations to existing homes (e.g. knock down, re-build) include installation of at least solar systems (and ideally also solar hot water and battery systems).

Finally, please, please, please decide on a sensible but ambitious clean energy target. Business needs certainty to invest and increasing renewables will help to minimise cost of power.
