INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND PRICES IN NEW SOUTH WALES

Organisation: Ryde Gladesville Climate Change Action Group
Date received: 16 October 2017

We are a community group of 700 who strongly believe that renewable energy should be the only source of power and that fossil fuels are the source of climate change. We believe that a minimum feed-in tariff that is fair should be paid to the thousands of people who have PV on their roof and who are contributing to power generation in NSW. This feed-in tariff should represent the true value of solar, meaning that it recognises the environmental and health benefits and network benefits of rooftop solar.
