No 62**

**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Ms Pamela Reeves

**Date received:** 16 October 2017

---

I have had solar panels on my roof for seven years and I think it is time that NSW legislated for a minimum feed-in tariff that is fair to me and the thousands of other people who have PV. I think it is unfair that the amount I am paid for anything my PV feeds into the grid is substantially less than what I have to pay to buy it. As a contributor to the supply of energy to the state, I feel I should be paid a much more reasonable rate.

I have PV because I believe renewable energy should be the only source of energy and that fossil fuels are damaging not only the natural environment, the air and water but the health of people. I changed my retailer to one who sources only renewable energy. I did this because my previous retailer actively tried to stop a strong RET and uptake of renewables.
