**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Mr Peter Hearn  
**Date received:** 16 October 2017

---

All governments of Australia have failed their citizens. Electricity prices have gone through the roof. You have allowed coal fired power stations to be shut down before there is enough renewable energy available. Also the current feed in tariffs are a joke. We have to pay 38 cents a kilowatt but only get 11cents feed in tariff.

Governments need to legislate that feed in tariffs be a minimum of 50% of the chargeable kilowatt hours.

If you can't fix it then resign your position.
