**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Anthony Tucker

Date received: 16 October 2017

Domestic solar systems should receive the same wholesale price as any major supplier for their contribution to the network. We produce more energy than we use, but do not receive a fair return commensurate with that received by origin, AGL and the other major producers. When the environmental benefits are considered as well, this is iniquitous.
