**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr William Conolly

Date received: 16 October 2017

When are you MP's, the leaders of Australia, going to get real about saving our planet, instead of sucking up to billionaire OS owned coal and energy companies filling your election funds with black money. The same companies are ripping off the private citizens like myself, who have taken the initiative and installed solar panels and storage, and who are being paid 6.5 c/kwh at any time. And what are peak users being charged - 48c/kwh !. I know my peak generation time is at the same time as peak usage is occurring across the state grid, and being charged. They pay me 6.5 c/kwh and charge me 48 c/kwh if I use the grid. Does that sound like a criminal rip off to you ?
It is time you MP's got some guts and initiative, and addressed the energy and climate crisis we are facing.
