**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Mark Shields

Date received: 16 October 2017

I think NSW needs a legislated, minimum feed in tariff that is fair: We are spending our own money on cleaning up the environment, which governments and coal fired power companies in this country have dismally failed to do.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; we are creating the new industries and massive employment opportunities and should be given equal or very close to commercial power prices.

With fair economic remuneration; renewable energy industries will be the ones creating the new base-load storage power and we will rid this country of the egregious denial; made by filthy coal lobbyists, ignorant-head-in-the-sand politicians and lazy vested-interest share holders.
