**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Peter Tough
Date received: 16 October 2017

As someone who has solar panels on my roof, I believe it is SO UNFAIR that the NSW Government has not legislated for a minimum feed-in tariff that is appropriate knowing what consumers pay for power from most Electricity retailers. Our investments are being abused by an industry that needs to be regulated, as they are still taking advantage of the present arrangements.
