

**Submission  
No 131**

**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Mr Chris Jones

**Date received:** 16 October 2017

---

To The NSW Upper House.

I am a solar user, and believe that there should be more NSW government and Federal government subsidies to encourage the use of rooftop solar systems. Rooftop solar systems are providing free energy for the electricity retailers, and they then on-sell that resource at a huge profit. A fair, legislated, minimum feed-in-tariff should be established, so that solar owners are compensated for their input into the grid.

I believe the NSW government has a responsibility, for future generations, to develop renewable energy alternatives, for NSW and rooftop solar systems are an important part of that solution.

Thank you.

Chris Jones
