No 132**

**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Mrs Stella Aird  
**Date received:** 16 October 2017

---

We were among the first people to join the solar system in our previous home with the 60cent rebate !! As pensioners it was a huge help in managing our finances. Having moved into a retirement village (with solar panels on the roof) the 6cents rebate is not enough to help us as our bill has now increased so much we are frightened to use the reverse cycle air conditioner!! Having worked into our 70,'s and paid tax for our whole working life it is sad to see how little the government/electrical companies care. Let's have a reasonable Tariff which will allow us to live with reasonable and fair costs for power
