**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr John Hunter

Date received: 16 October 2017

I don't think that it is fair for AGL to pay me approx. 11c/kWh for the power my solar panels generate so that they can charge me (later in the day) and my neighbours twice to four or five times that to use those kWh. I think it is exceedingly UNFAIR to charge me nearly one dollar per day for the privilege of doing it. Any fairer retailer/government would get my vote.
