**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Peter Lamb

Date received: 16 October 2017

I have had solar panels for about 3 years. The present feed-in tariff is totally inadequate. The fact that so many people have opted to install PV cells assists retailers and Governments. Governments benefit because they have not needed to build new generators. The retailers benefit by having extra electricity to sell at exorbitant prices.

We are assisting the government in their climate change commitments.

How about us receiving a fair price for our feed-in electricity?

Yours sincerely

Peter Lamb
