**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr John James
Date received: 16 October 2017

I have solar plus batteries, a 5.2Kw system. Others like me should be supported in this. With the hottest year on record promised from here on the strain on the air con and other cooling systems will strain, if not fracture, the electricity grid. You should be encouraging us to install more for the heat will keep getting worse and only solar systems can take full use of the sun just when it is hottest to keep us cool.

John James
