**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr David Hunt

Date received: 16 October 2017

Politicians should also blame themselves. Broken promises after broken promise. They promised power prices would come down when the power was floated. They encourage us to go into solar to reduce the burden on the grid, followed their advice & now get ripped off. We should be able to use our generated power and only pay for power in excess of what we use.

Worse case scenario use our daylight power & get paid the wholesale price for our excess which goes back to the grid.

We have laid out our hard earned money due to politicians promises not its time to honour your cheaper power promises.
