**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Colin Christie

Date received: 16 October 2017

It is only fair to provide a reasonable buy back rate after citizens have spent their own funds to reduce the base load. The government should dump 6 solar panels on the front lawn of home and have owners hook them up. Every bit helps to reduce the base load. Cheaper than building more power stations.
