**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Chris Clarke
Date received: 16 October 2017

A government that actually represents its constituents will ensure that power is given at a price that gives the retailers/producers a FAIR return, not gouging level profits. Feed in tariffs, if fair, would equal the price that consumers pay for power, not a token amount as then the feed in power could be passed on to consumers without solar.
