**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Somnath Chatterjee

Date received: 16 October 2017

I strongly support a legislated fair price and a minimum feed-in tariff (FIT) for solar that is fair and represent the true capital cost of putting in a system. I declare that I have a solar system even though it incurs a loss to me because of the very low FIT. The system benefits the society with renewable power and environmental and health outcomes that are strongly positive.benefits

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
