**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Bruce Vickery

Date received: 16 October 2017

I asked my retailer for a fair price but they would not provide more than 6 cents per unit yet they charge 5 times that amount. I support a legislated fair minimum price. That way competitors could offer more but not less than a fair price. Solar and battery technology need to be supported. These technologies will support the future energy needs of Australia.
