**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Michael Duffett

Date received: 16 October 2017

I have installed solar panels to reduce my load on the electrical supply system and hopefully ensure better supply for others. However, the price paid for energy fed into the system is less than half of what is charged to users. Considering all users have to pay exorbitant daily supply charges, irrespective of how much is used or supplied to the system, there needs to be fairer prices charged or paid by the energy suppliers.
