**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Michael Taylor

Date received: 16 October 2017

I have just one thing to say instead of paying house hold incentives not to use power over the summer months, how about putting rebates on the battery systems for the house holds that already have the solar panels on their roof or for every body, if they did that you would find out that there would be a lot of house hold go for battery setup.
