**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Des Brennan

Date received: 16 October 2017

As a retired voter and electricity user with solar panels, I expect that the energy companies should pay a reasonable and fair price for my Net meter power, it supports the grid and supports the unnecessary coal power fired stations. I expect my elected representatives to support a fair and balanced system not one which favours the privatised energy companies.
