No 186**

**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Mr Jack Williams

**Date received:** 16 October 2017

---

I believe we energy exporters are entitled to at least the cost of the rate we buy at. Bearing in mind after 2pm the cost of power skyrockets to over double the shoulder rate. And what do we get? 10-15 cents per Kwh Why are energy provider allowed to charge 3 times or more for the SAME commodity?

It's just not fair. Considering my personal investment in solar has been well over \$40,000 dollars. Well i feel let down and disillusioned by the NSW Government. While Queensland still gets 48 cents a unit. Come on get real. Help out the little guy. Your electors should come first.
