**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr David Horne

Date received: 16 October 2017

Please listen to the people. We pay enough already for power, we give back to the grid what we don't use, and the power companies rip us off by not paying us what is a fair price.

They now want people to turn their air off or run higher temperatures during peak time to help with peak power loads during summer. As solar owners we are already doing our bit. Without solar the grid would collapse.
