**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Ms Gillian Reffell

Date received: 16 October 2017

i really feel that the cost of solar feed-in electricity should be higher than it is. Electricity is electricity so there should be some match up between the cost of electricity taken from the grid and that given.

The cost of poles and wires should be more transparent.

It was a mistake to sell the poles and wires because the government would be better placed to oversee the transition to a new distribution system. This seems to be inevitable.
