No 211**

**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND  
PRICES IN NEW SOUTH WALES**

**Name:** Mr David Craddock

**Date received:** 16 October 2017

---

I have a small rooftop solar system and I am very concerned that we do not have a fair price for my solar energy. I want to see a legislated fair price for solar energy. I would like to see some leadership from government, instead of only supporting the owners of large power stations. When I changed to my current energy provider I asked about obtaining a smart meter - so I could at least use my own power, before sending excess to the grid. I was told that would happen earlier this year. So far I have not heard anything, except for their invoices. Our Prime Minister has said on many occasions he wants this to be a clever, or smart country - how about this State Government doing something smart, for a change, and lead us into a cleaner future?
