**INQUIRY INTO ELECTRICITY SUPPLY, DEMAND AND
PRICES IN NEW SOUTH WALES**

Name: Mr Mark Sbarrato

Date received: 16 October 2017

Dear Inquiry members,

Please legislate a minimum solar feed in tariff of 60c per KiloWatt.

There is no reason why the electricity industry should not pay this price for electricity they don't even have to generate themselves. This is, after all, the amount they were paying up until December last year. They are currently getting away with robbery offering a pittance. Rooftop solar is also saving them an enormous amount of money in infrastructure maintenance. Not to mention the environmental and health benefits of moving away from fossil fuels to renewables.

Thank you.
