**INQUIRY INTO WINDSOR BRIDGE REPLACEMENT  
PROJECT**

**Name:** Mr John Gale

**Date received:** 28 November 2017

---

Currently the intention is to build a sub optimal bridge connecting with roads through the heart of the historic Windsor. This when the traffic has expended dramatically with 1000 plus double-d trucks, per day, full of sand using this thoroughfare (expected to exceed 1600 trucks with the construction of Badgeries Creek Airport)

Why not build a by-pass, as is done in many historic towns in NSW ? Bridge not 39 meters down stream but a couple of kilometers up stream. Have high ground (flood resistant) on both banks, save historic Windsor and make the locals happy ?

I am looking for good governance and good policy.

Do not disappoint me !
