

INQUIRY INTO WINDSOR BRIDGE REPLACEMENT PROJECT

Name: Ms Maureen Radnidge

Date received: 1 December 2017

Thank you for the opportunity to submit. This Is regarding the impact on historical Thompson Square. Our European historical footprint is very tiny in this land. The significance of Windsor in this story is great. I see the difficulties in reaching the towns across the river and the need to create another crossing. I understand the economic implications. However I feel we should not destroy or make this important location inaccessible to all citizens. This site is as significant as the Rocks in Sydney and should be left untouched. The footprints of our founders are on this site and as inheritors of Macquarie's legacy we say no to this proposal. It is right that we have access to the sacred site which represents our storyline.

Thank you,

Maureen Radnidge
