

INQUIRY INTO WINDSOR BRIDGE REPLACEMENT PROJECT

Name: Mr Phillip Knobbs

Date received: 15 December 2017

ThompsonSquare, an historic, tourism, goldmine. Where else would you find a treasure such as this being trashed by an uncaring state and federal government. The priceless aboriginal and European artifacts that are being secretly unearthed to make way for a bridge monstrosity, must be preserved and turned into a nationally significant museum of actual examples of how things were done in the very early days of Australia,s history. We believe this is what Windsor needs to ignite more interest in this historic town.You cant just make history, its here. We talk to people at the square, local and overseas, and they are gobsmacked at the utter stupidity of putting 1000,s of noisy polluting trucks and 1000,s of other vehicles of all types through this sacred place." Would never be allowed where I come from". Our local member PERROTET has betrayed our local community on this matter by ignoring, never communicating, and treating us with contempt when most other towns with less traffic are bypassed
