**INQUIRY INTO WINDSOR BRIDGE REPLACEMENT
PROJECT**

Name: Mrs Rhona Hughes

Date received: 21 December 2017

To Whom it May concern,

I would like to register my deep concern that the history and character of the township of Windsor are being treated as not important and not significant to the people and country of Australia. As a migrant from England, I know and understand the importance of preserving our historical heritage. We have such a short history in Australia, that every little scrap of it is important. The RMS have located brick barrel drains ... these are fine examples of our earliest beginnings. Our town of Windsor is one of the most heritage rich areas in Australia. It is atrocious that the oldest town square in Australia is being ripped up, and potentially destroyed by the RMS. There is a simple and sensible solution ... to build a bypass, as has happened in so many other NSW towns. Yes, it may cost more initially. But the proposed solution of a two lane bridge to replace our old two lane bridge is a bandaid solution that does not address the future traffic issues of a developing area.
